

CONCLUSION OF THE INVESTIGATION

After we eliminated some of our suspects, only a few of them remained :

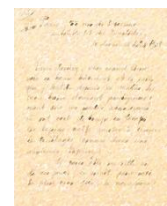

The date of the murders corresponds with the date during which Gery Legrand was the mayor of Lille, so, it couldn't have been him!

We can't clear Aaron Kosminski or Walter Sickert due to the fact that nobody knows what they were doing at that time.

But, for me, the two main suspects are Alfred Mongy and Pharaon de Winter because of this letter:

"Dear Thomas Bulling,

I read that you were interested in the ripper case. I might have information for you: 2 of my staff were in London during the events: Mongy and Winter.

Let's meet.

Gery Legrand"

Thomas Bulling was someone who was investigating the Ripper case at the time of the murders. So, I think the clues in the letter are obvious. One of those staff may have been Jack the ripper.

Then, we had discovered that a piece named "Jack the ripper's bedroom" by Walter Sickert was covered with black paint. We carried out a chromatography in order to discover who did this. Pharaon de Winter did it.

Then, we discovered a plan of Lille; in which Marie-José indicated that the house of her n°1 suspect was on a certain point on that map. We used segments, circles and a perpendicular bisector and we discovered a point: Pharaon de Winter's house.

In conclusion we can assert that Jack the Ripper is Pharaon de Winter.

This is historical fiction from the high school Notre Dame de la Paix, Place du Concert, Lille.
